

Smile savers

Boost your confidence and oral health with Invisalign, the solution to teeth-straightening that no one else will know you are wearing.

While straighter teeth are undeniably beautiful, they can also do wonders for your oral health. Here's why a perfectly aligned set of teeth is good for you:

IMPROVES ORAL HEALTH

Straight teeth are much simpler to clean. While toothbrushes now are designed to reach every nook and cranny of your teeth and gums, removing plaque from crooked and crowded teeth can be challenging. Over time, the build-up of plaque can lead to bad breath, gum disease and cavities.

BETTER BITE AND SPEECH

You can bite, chew and speak more effectively with well-aligned teeth. Any misalignment can cause difficulty in pronouncing certain letters and syllables. At times, you may even develop a perceptible lisp. Proper teeth alignment

can help you enunciate more clearly and speak with greater confidence.

MAINTAINS TOOTH STRUCTURE

Good alignment reduces the imbalance of stress on teeth when biting and chewing, which lowers the risk of developing abnormal wear and tear patterns. It also helps your jaw muscles to stay relaxed, reducing headaches or facial pains caused by an imperfect bite.

Now that you know how important it is to have straighter teeth, it's time to take action to achieve them. Consider Invisalign, a tooth-straightening system using a series of clear and removable custom-made aligners to reposition teeth over time. Barely noticeable, so that you can undergo treatment discreetly, they are the perfect solution for working adults who won't consider traditional braces.

Invisalign also fits in well with your lifestyle as it can be removed for eating and brushing. This makes it easier to maintain oral hygiene throughout the course of treatment. They are also more comfortable to wear and you can replace a set of aligners – on your own – every two weeks. This means fewer visits to your dentist or, in this case, Platinum Elite Providers of Invisalign who are the most experienced with the technique.

WITH A BEAUTIFUL SMILE...

- You'll appear more confident and self-assured.
- You'll smile more often, making you and the people around you happier.
- You'll always look great in photos – and real life.
